| 27       | 4,0   | 5,0   | 4,0       | Coperto, piogge deboli                                |
| 28       | 2,0   | 5,0   | 10,0      | Coperto, piogge, temp. in diminuz., neve/800m         |
| 29       | 1,0   | 3,0   | 6,0       | Coperto, piogge e neve anche a Perugia centro, 3-4 cm |
| 30       | 0,0   | 4,0   |           | Nuvoloso, tramontana, freddo intenso                  |
| 31       |       |       |           |                                                       |
| MED.TOT. | 5,1   | 14,2  | 25,0      |                                                       |

| RIEPILOGO            |      |                                                                                                                                                                                                                                                                                         |
|----------------------|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| GIORNI DI PIOGGIA    | 4    | Mese anomalo per il perdurare delle alte pressioni, solo alla fine vi è stata una rottura del regime anticiclonico con una perturbazione da nord che ha portato freddo e neve anche a Perugia. Nel complesso, precipitazioni scarsissime pari a solo il 20-25% della media di novembre. |
| TEMPERATURE MIN °C   | 0,0  |                                                                                                                                                                                                                                                                                         |
| TEMPERATURE MAX °C   | 19,0 |                                                                                                                                                                                                                                                                                         |
